❖ OUR SYSTEM ANALYSIS

➢There are two Actor in our system:

      1)Customer

      2)Jobber

➢First of all user/customer must have to register into the system. After that user must enter their email id and password to login into system

➢Without login user can only view in the home page only

❖ THERE ARE TWO REGISTRATION OPTION

1. Customer Registration
2. Jobber Registration

❖ CUSTOMER REGISTRATION

➤In user login he/she must have to register first then he/she can login.

➤Without login User can not view the services like Cooke, tailor and home decorator into our system.

➤Also User can not view prices of particular price of particular services, rating if user want to purchase the service then he/she first have to register and after that login

❖ CUSTOMER REGISTRATION

➢ Login user can give feedback if they want and also gives rating to the services and also add service and cancel services

➢ Login user can filter price search, area wise search After that only that data will be shown so it will be easier to find services in nearest area with low or filtered price of their particular requirements.

❖JOBBER REGISTRATION

➢Jobber must have to register and in that he/she can select the category with his/her interest & skills.

➢After that jobber must provide their all details through registration form.

➢And then jobber can login into our system to view his/her customers.

➢If the customer purchase their service after that jobber can view his/her details & requirements and after that he /she confirm then give services of specific time

➢If jobber want to cancel their service after that customer view that jobber cancel their service and after that he/she can book another service of their requirements

TECHNICAL DETAILS

➢**Front end** : HTML,CSS,Bootstrap,Javacript

➢**PDF tools** : Microsoft PowerPoint 2017

❖WEBSITE CONTENT

➤One login Page for Login Customer and Jobber They have different User ID and Password.

➤If they can not login In our Website Then They can Register. In Registration there are two Types Jobber and Customer.

➤In our website there are Home Page view Without login.

➤We also provide Jobber profile page in that she can edit, view and remove their profile content.

❖ ADVANCE FEATURE WILL PROVIDE IN FUTURE

➤ We will provide payment gateway so that jobber and customer de their payment through credit card/debit card/UPI/Cash on delivery.

➤ We will also provide Wishlist & add to cart system where the customer add and remove their services

➤ After the service ends we provide the rating system if any user have any suggestion or improvement then that is also available.

➢After that subtotal will be calculated and then we provide checkout form to provide name,email,phone number, address and in last we provide payment gateway and that payment directly sent to the jobber account.

➢In Rating Customer and jobber both can give rating &review into our system.
